

Estimation of prey consumption by marine mammals in the PICES regions -Update to Hunt *et al.* (2000)-

Tsutomu TAMURA¹, Kenji Konishi¹, Koji Matsuoka¹,
Takashi Hakamada¹, and Andrew W. Trites²

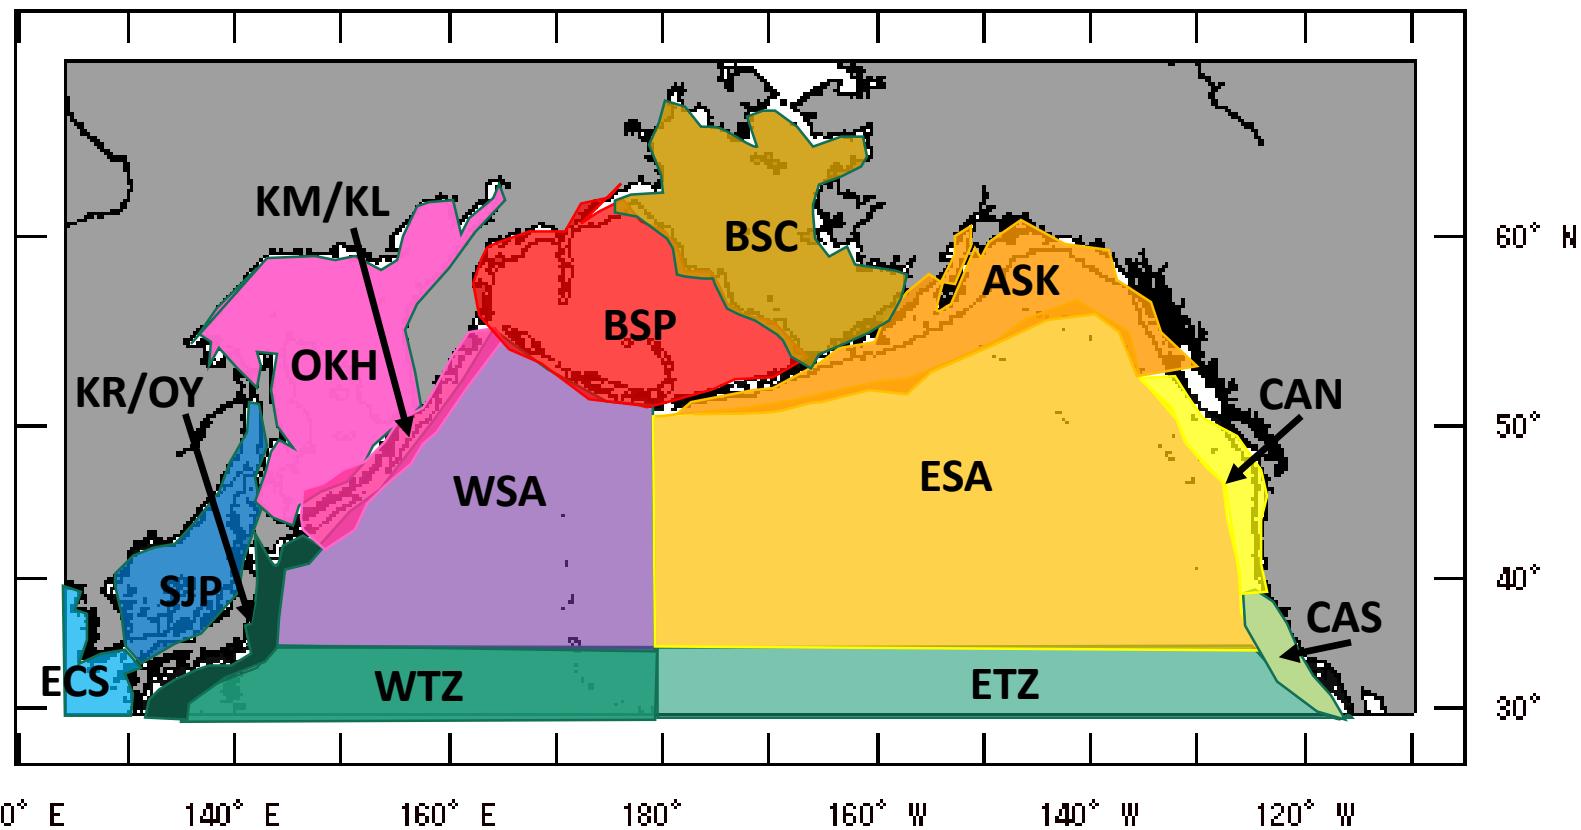

1: Institute of Cetacean Research, Japan

2: University of British Columbia, Canada

Previous study – Hunt *et al.* 2000 -

135 species of sea birds,
47 species of marine mammals

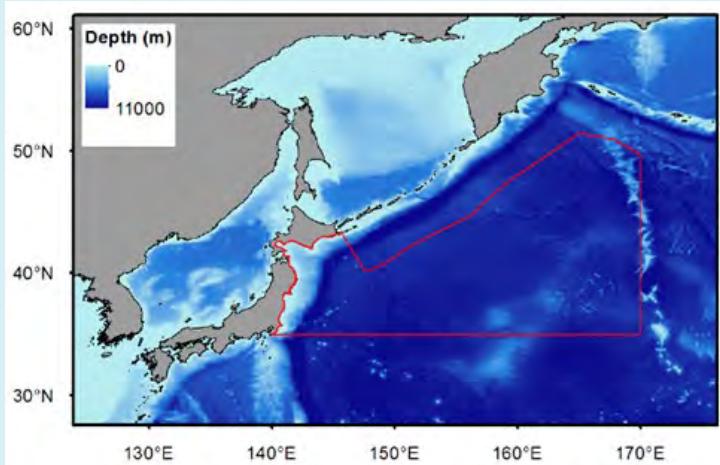

Update issue-

- Up-dating PICES Scientific Report 14 on prey consumption by marine mammals in the western North Pacific.
- 1) Abundance JARPNII (Japan), IWC-POWER, Domestic sighting (Japan) and references
- 2) Prey consumption New equations by Trites
- 3) Days of occupancy 122 days (June – September)

Abundance -Cetaceans-

JARPNII
2000-2016 WSA+KR/OY

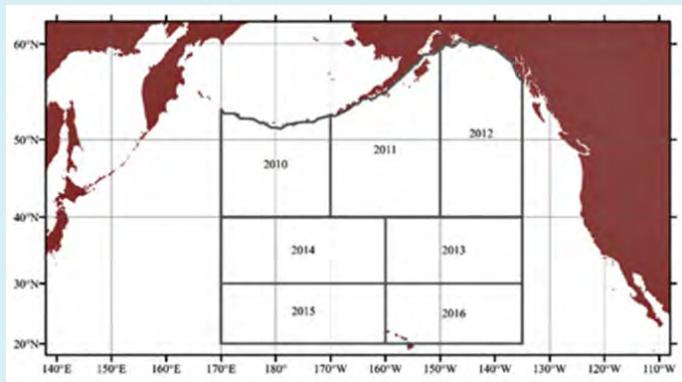

Hakamada and Matsuoka 2016

Species name	Abundance	Coefficient of Variation
Common mnke whale	3,080	0.68
Sei whale	5,086	0.38
Bryde's whale	13,306	0.25
Blue whale	958	0.46
Fin whale	3,958	0.43
Humpback whale	392	0.88
Northern right whale	416	0.65
Sperm whale	10,843	0.36

Abundance -Cetaceans-

IWC/POWER

Estimation of daily prey consumption

Trites *et al.* (in prep)

LOW cost of living

$$R = 0.797811M^{0.6325}$$

R = daily ration (kg/day), M = mass (kg)

- Right whale
- Sperm whale
- Cuvier's beaked whale
- Bottlenose dolphin
- Pacific walrus
- Northern elephant seal
- Australian sea lion
- Sea Otter

Estimation of daily prey consumption

Trites *et al.* (in prep)

MEDIUM cost of living

$$R = 0.101555M^{0.8387}$$

R = daily ration (kg/day), M = mass (kg)

- Fin whale
- Beluga (white) whale
- Long-finned pilot whale
- Stripped dolphin
- Spinner dolphin
- Rough-toothed dolphin
- Risso's dolphin
- South American sea lion
- South African fur seal
- Ringed seal
- Grey seal
- Harp seal
- Harbour seal

Estimation of daily prey consumption

Trites *et al.* (in prep)

HIGH cost of living

$$R = 0.37222M^{0.7144}$$

R = daily ration (kg/day), *M* = mass (kg)

- Humpback whale
- Minke whale
- Killer whale
- Pacific white-sided dolphin
- Dusky dolphin
- Common dolphin
- Commerson's dolphin
- Harbour porpoise
- Steller sea lion
- California sea lion
- New Zealand sea lion
- Northern fur seal
- Antarctic fur seal

Prey consumption by marine mammals in each sub regions of PICES

Sub region of PICES	Prey consumption (t)
SJP (Sea of Japan)	115,142
KR/OY (Kuroshio/Oyahio Region)	75,984
OKH (Sea of Okhotsk)	2,227,430
KM/KL (Kurile Islands Region)	347,924
WTZ (Western tropical zone)	1,399,893
WSA (Western subarctic)	2,856,228
BSC (Bering Sea continental shelf)	4,966,369
ASK (Gulf of Alaska continental shelf)	189,876
ESA (Eastern Subarctic)	7,592,938
CAN (California current North)	160,208
Total	19,931,992

Summary

- The estimation of prey consumption by marine mammals could up-dated using new proposal equations in PICES region.
- Total prey consumption by marine mammals during feeding season is estimated to 19.9 million tons in PICES region.
- More information is needed on the **abundance** and **prey energy** of marine mammals to make a more realistic table of prey consumption till next year.

Thank you for your attention!
