1. INTRODUCTION

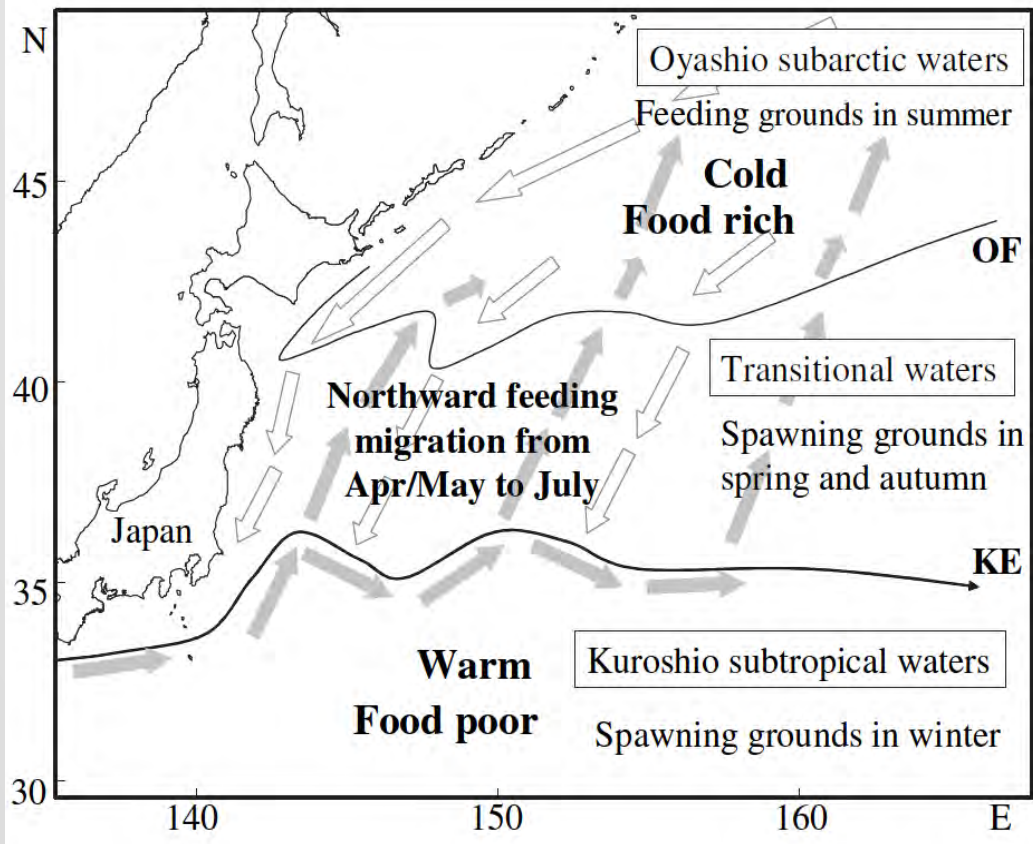

There are about 60 China's PS fishing vessels operated in the NWP.

The fishing area mainly distributed outside of Japan/Russia's EEZ .

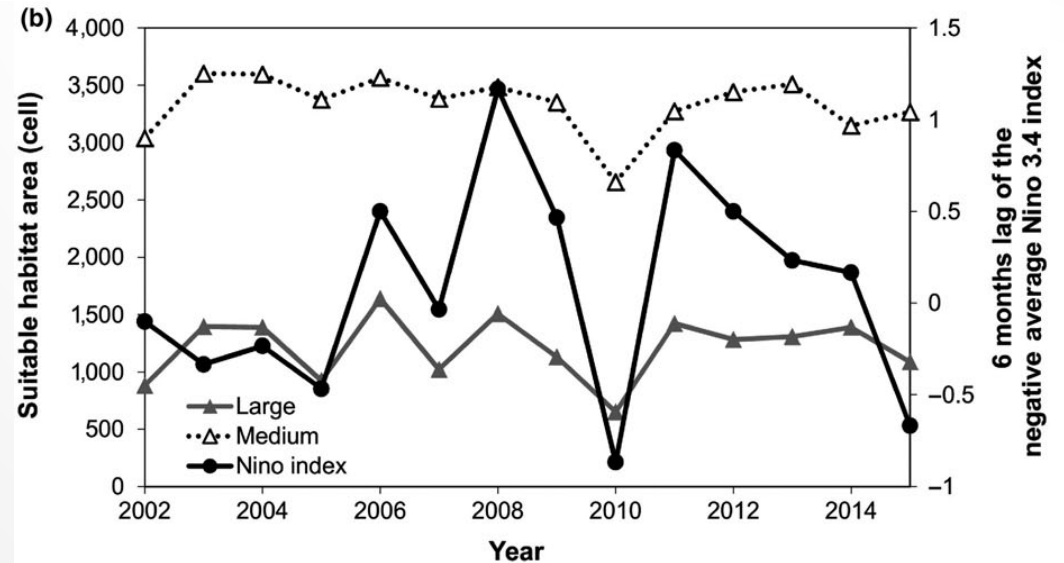

Main fishing season: June to November

1. INTRODUCTION

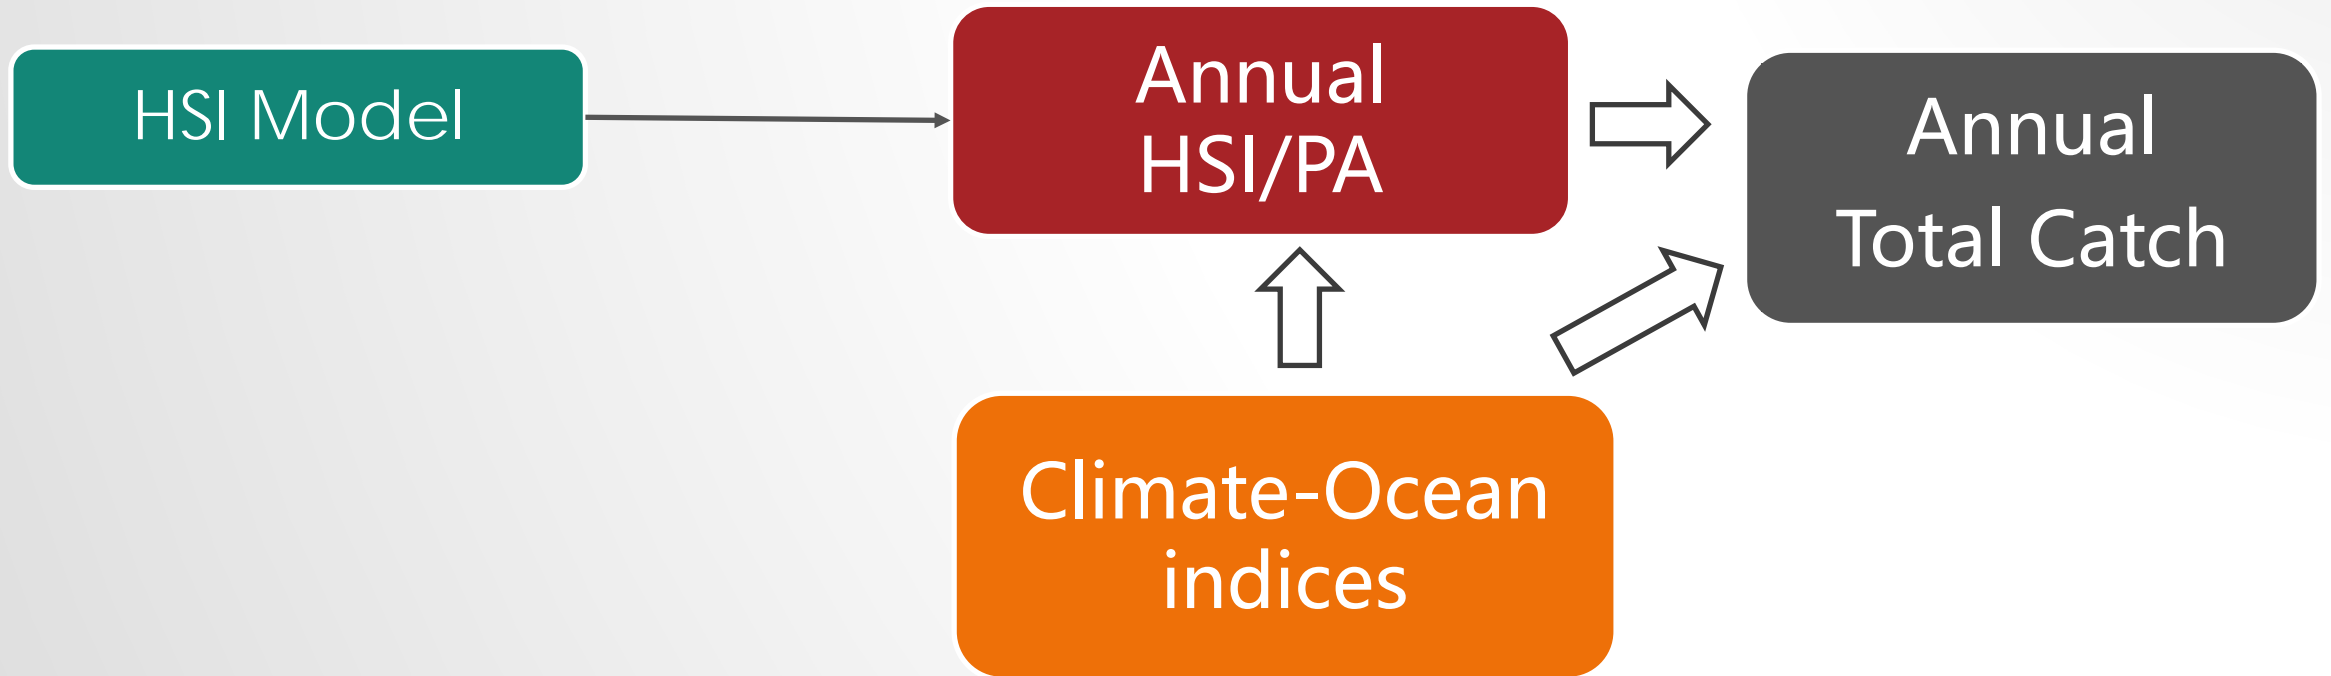

(Kurita, et al, 2004 ; Tian, et al, 2003)

(Chang, et al, 2018)

1. INTRODUCTION

(PA: potential suitable habitat area)

2. MATERIAL AND METHODS

HSI Model

- Fishing Data
- Oceanographic Data (2003-2017)

- Yield-Density Model (SI) (Reciprocal of binomial)

- Weighted arithmetic mean model (WAMM)

(Hua, et al, online)

$$SI_{v,i} = \frac{Effort_i}{Effort_{max}}$$

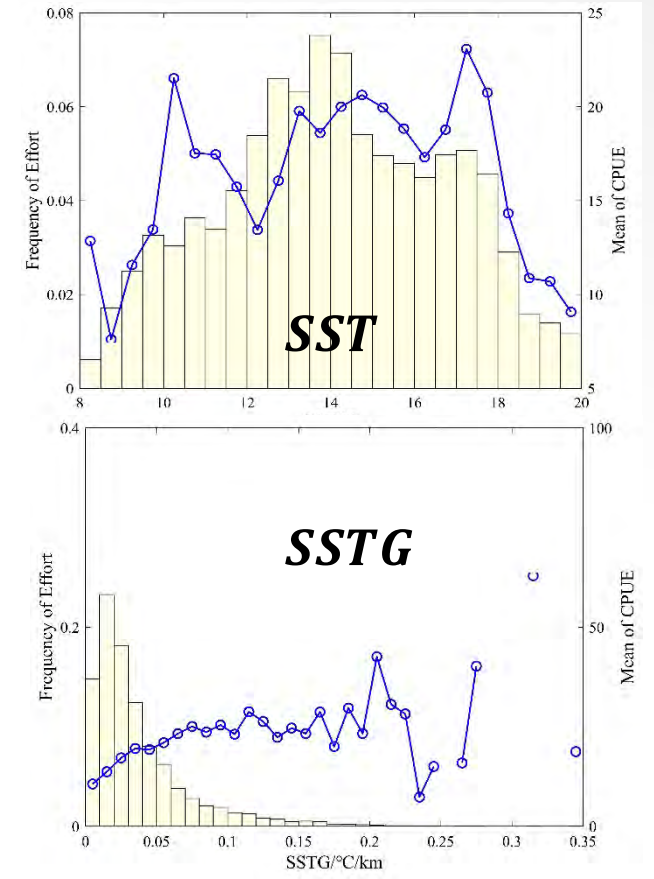

$$y = \frac{1}{(a + bx + cx^2)}$$

$$HSI = SI_{sst} \cdot W_{sst} + SI_{sstg} \cdot W_{sstg}$$

BRT

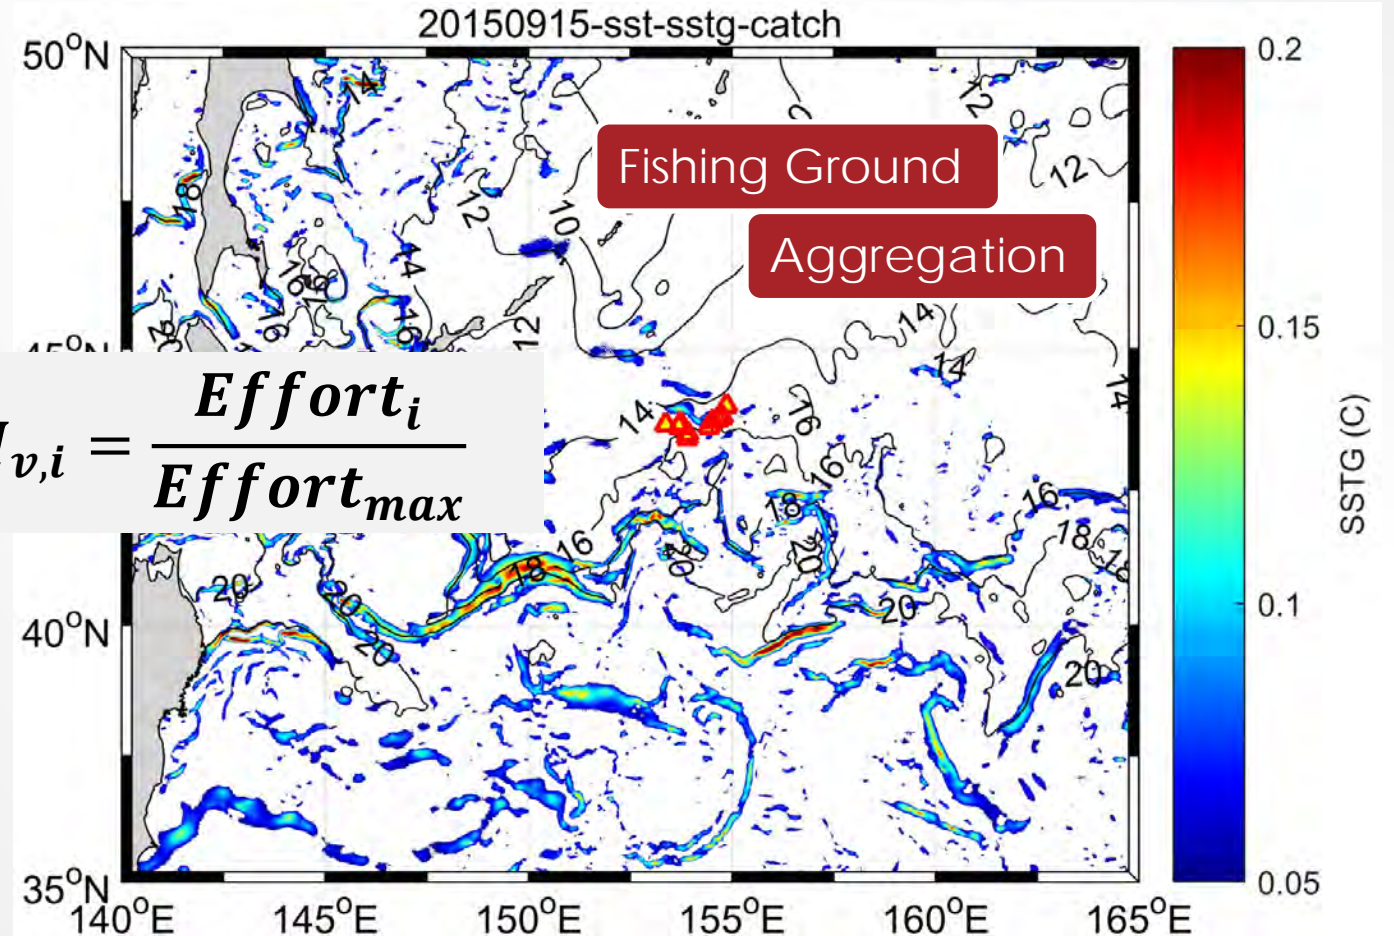

2. MATERIAL AND METHODS

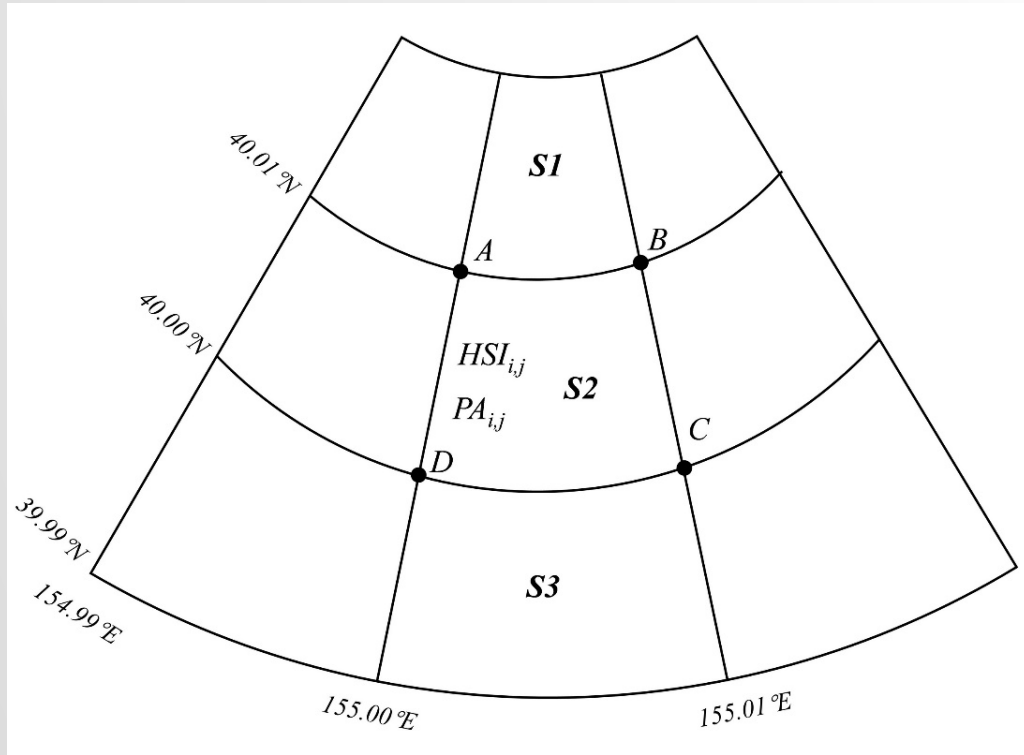

HSI Model

- Fishing Data
- Oceanographic Data
(2003-2017)

$$SI_{v,i} = \frac{Effort_i}{Effort_{max}}$$

2. MATERIAL AND METHODS

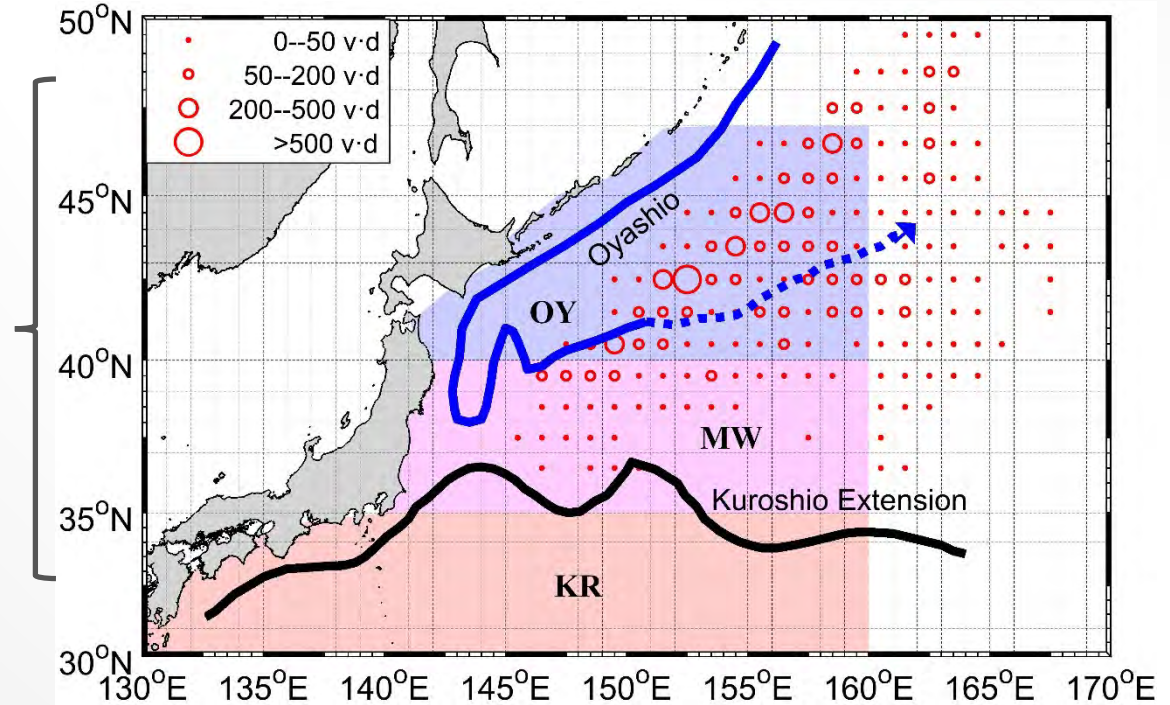

Potential suitable habitat area (km²) (PA)

$HSI \geq 0.6$
 WGS84

Annual HSI/PA

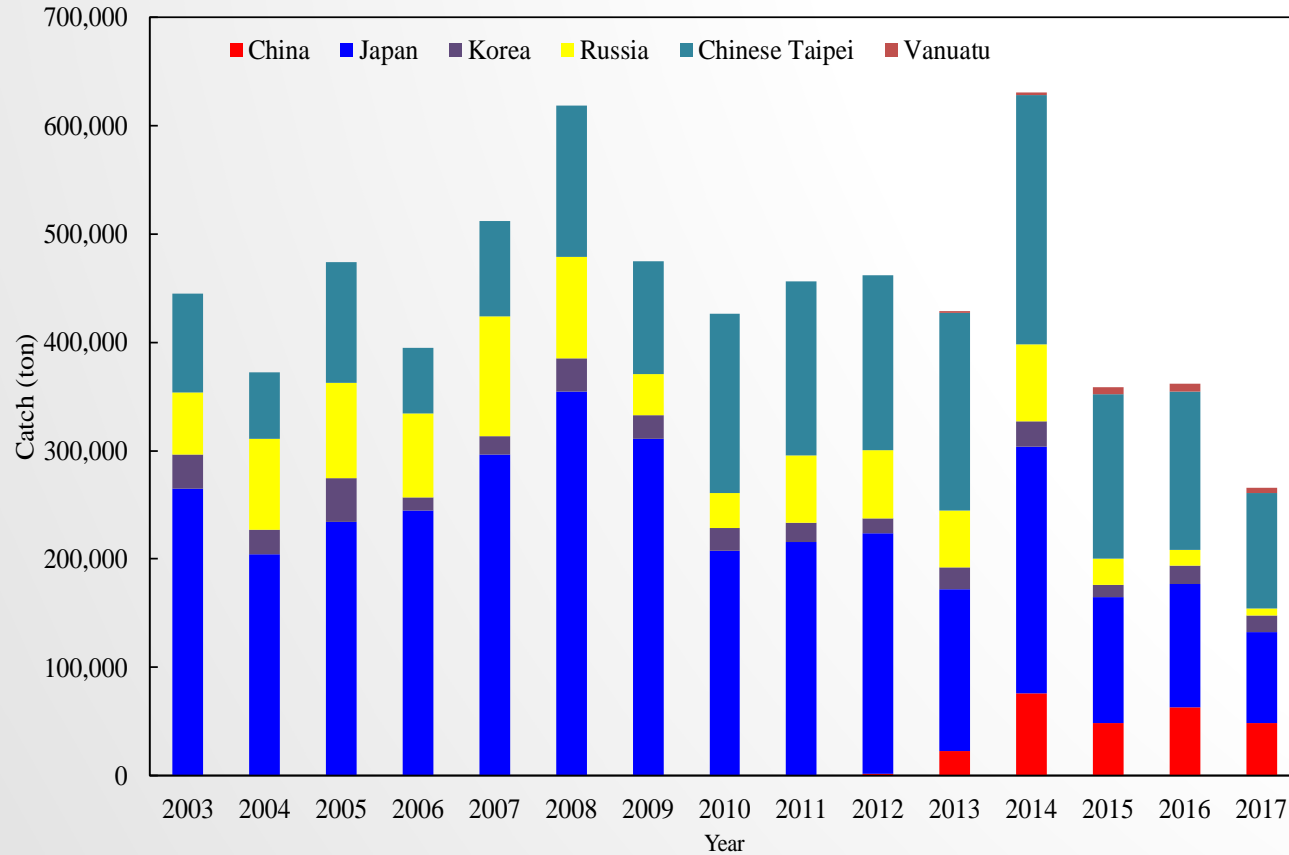

- PA FA
- PA MW
- PA OY
- PA KR

- HSI FA
- HSI OY
- HSI MW
- HSI KR

(Ito, et al, 2007)

5. Summary

3. RESULTS

HSI Model

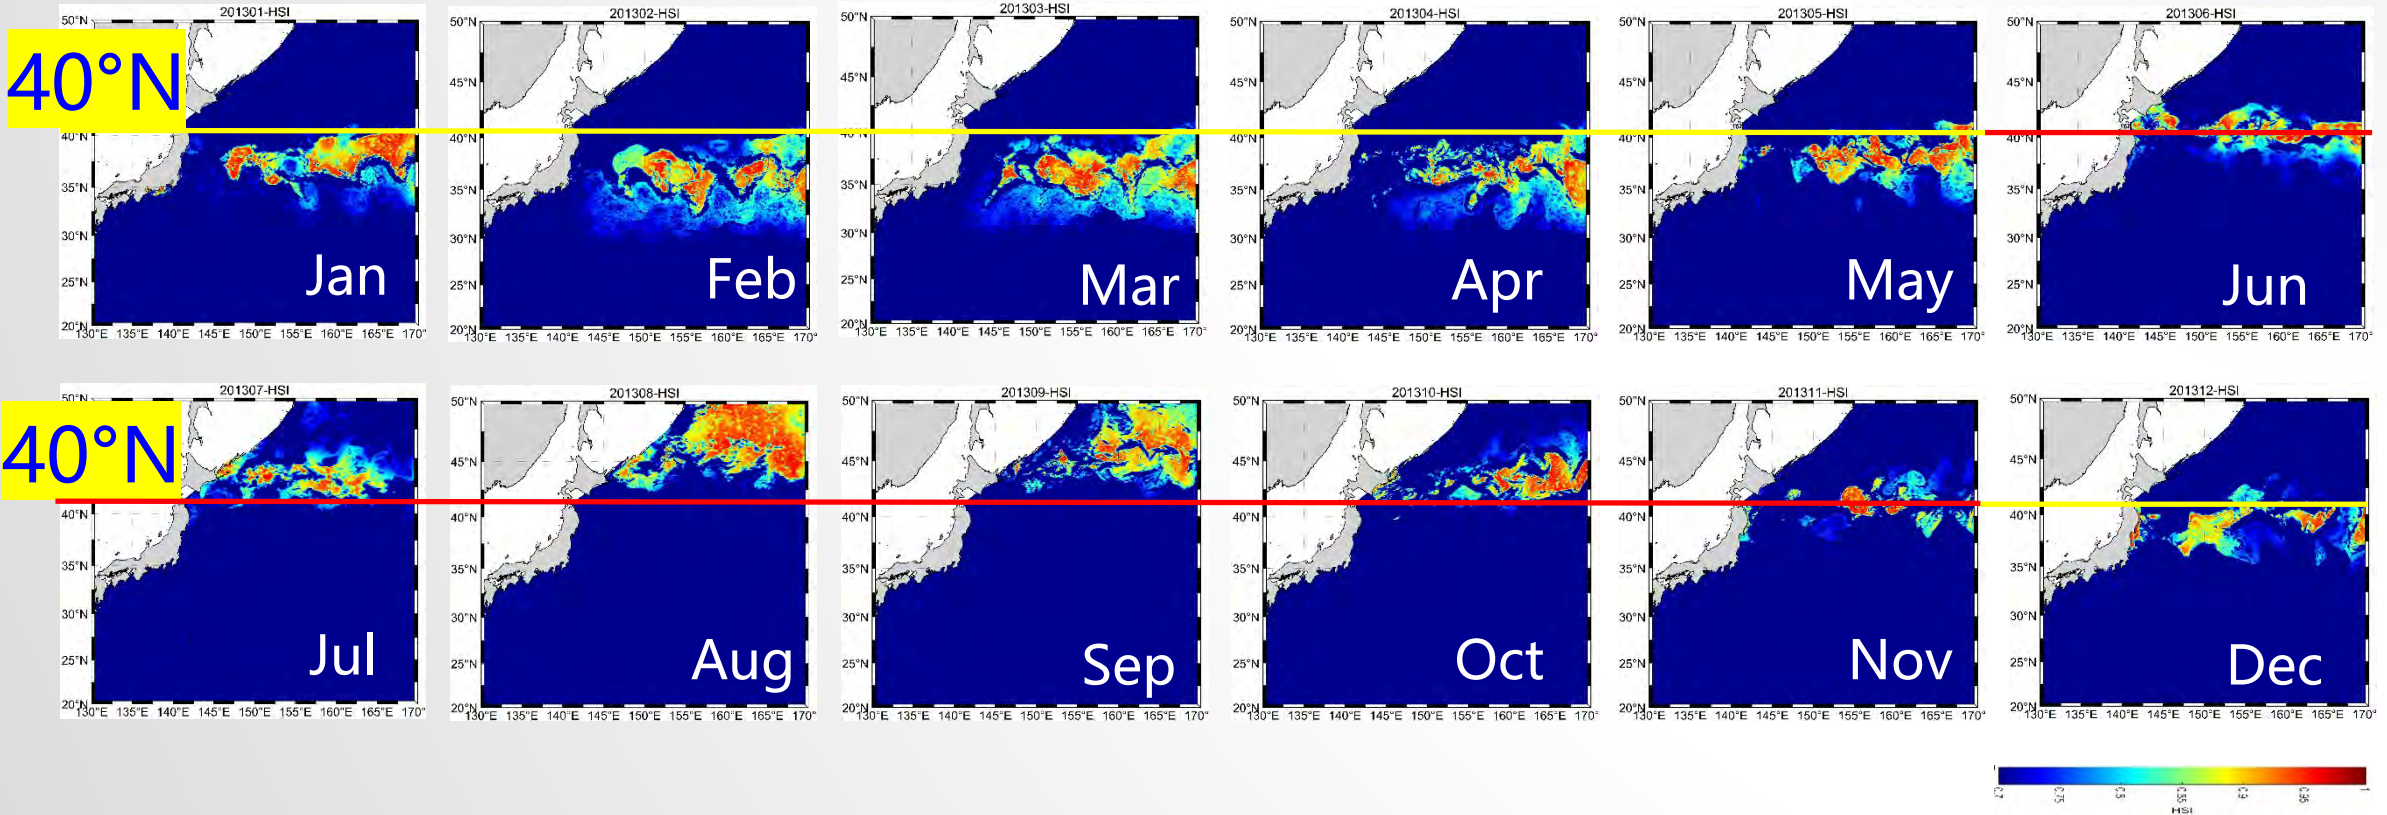

Variable	Unit	Opt	95% CI	
SST	°C	14.05	14.02	14.07
SSTG	°C/km	0.0179	0.0178	0.0181

$$HSI = \hat{SI}_{sst} \cdot 41.10\% + \hat{SI}_{sstg} \cdot 58.90\%$$

3. RESULTS

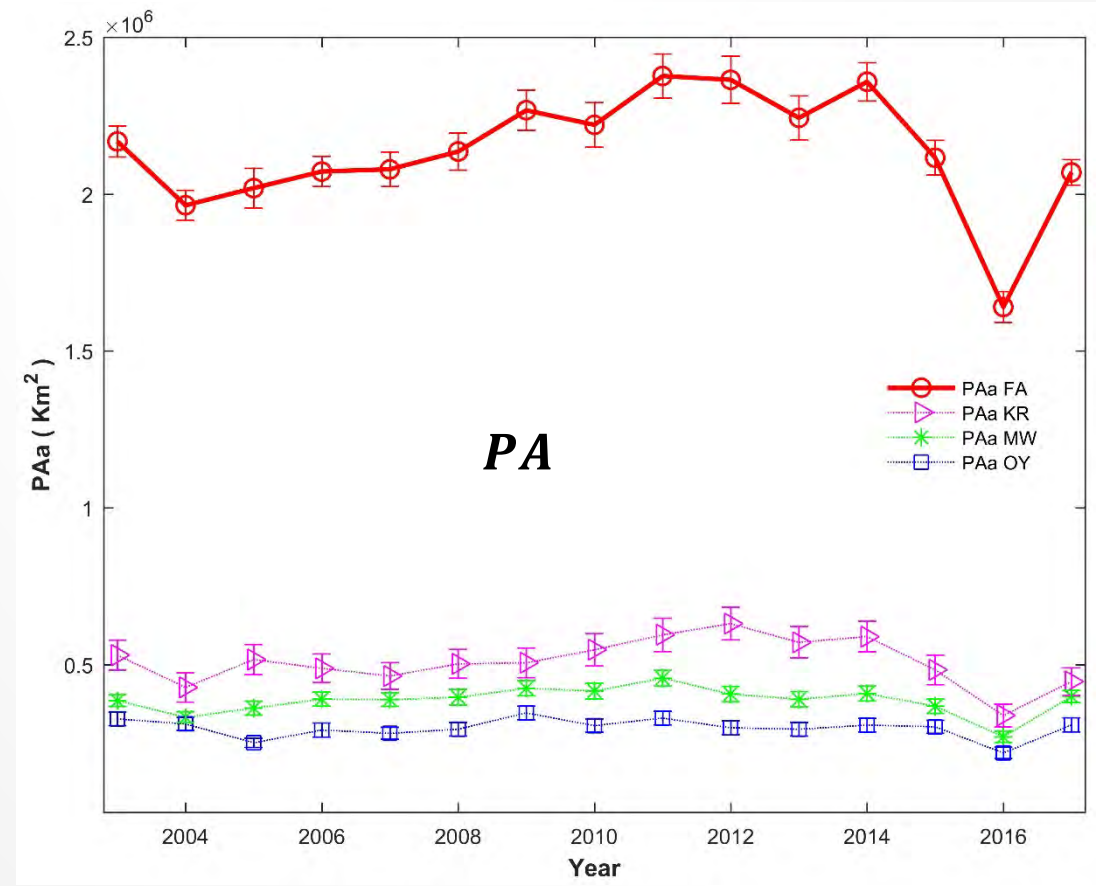

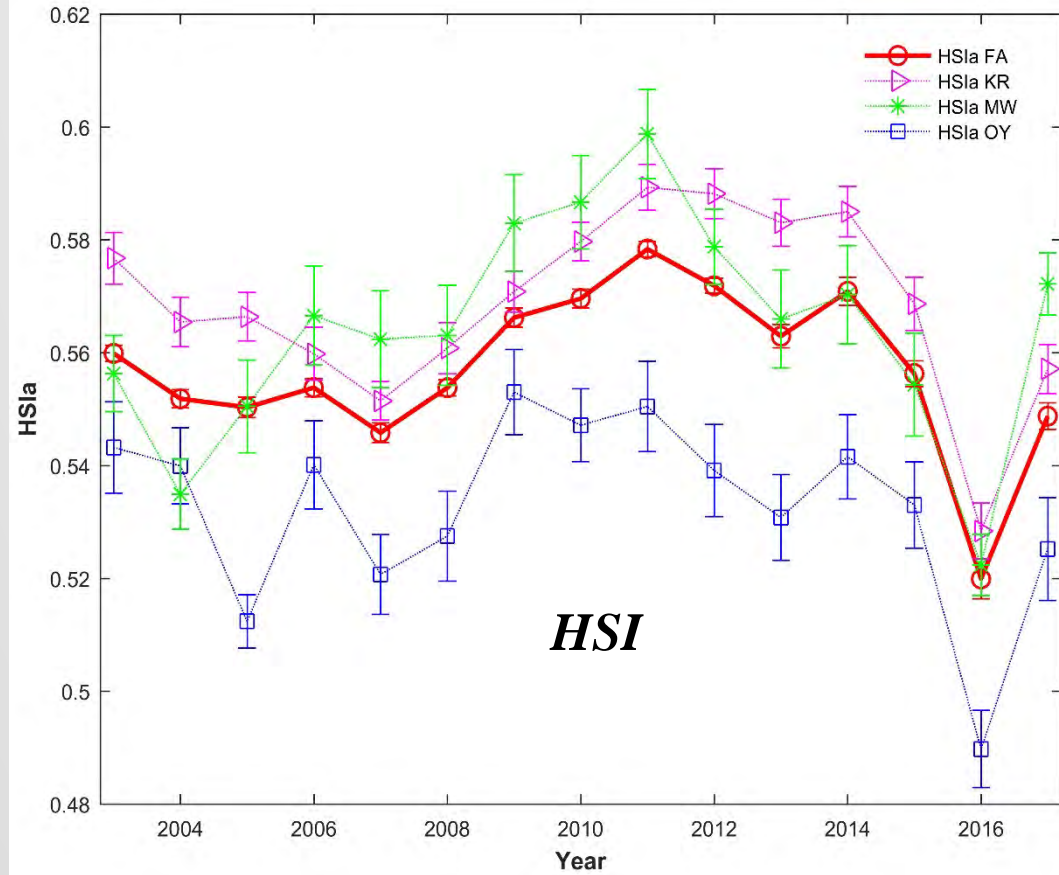

Monthly distribution of HSI

- ◆ In Winter and Spring, High HSI ($HSI \geq 0.6$) area, distributed in MW, southern 40°N
- ◆ In main fishing season: northern ward in Jun-Aug Southern ward Sep-Nov northern 40°N

3. RESULTS

Annual variation of HSI / PA

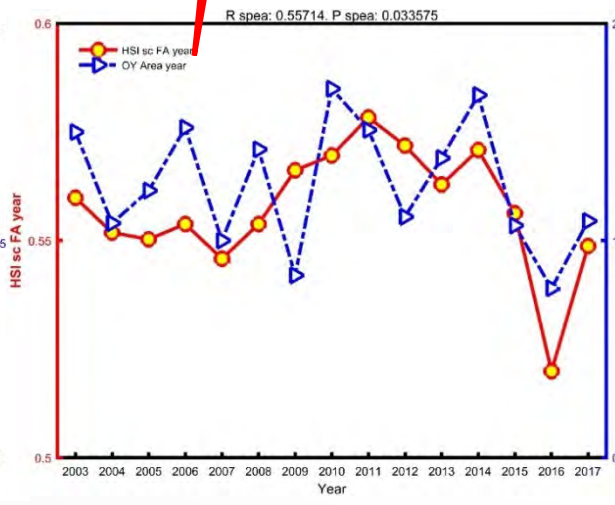

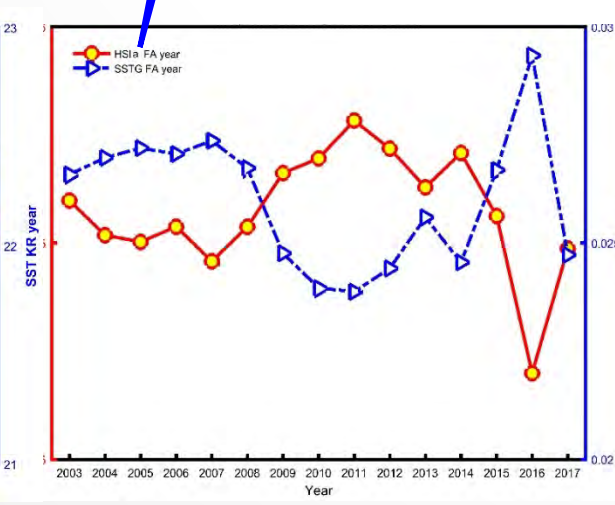

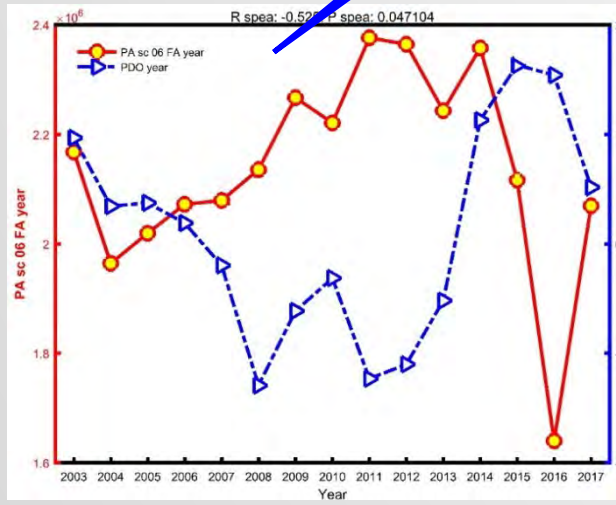

◆ In 2016, the value of annual FA/PA was significantly lower than other years.

3. RESULTS

The relationship between yearly HSI/PA and climate-ocean indices

5. Summary

4. DISCUSSION

Oceanographic of Fishing Ground

4. DISCUSSION

The SSTG

Medium and small scales

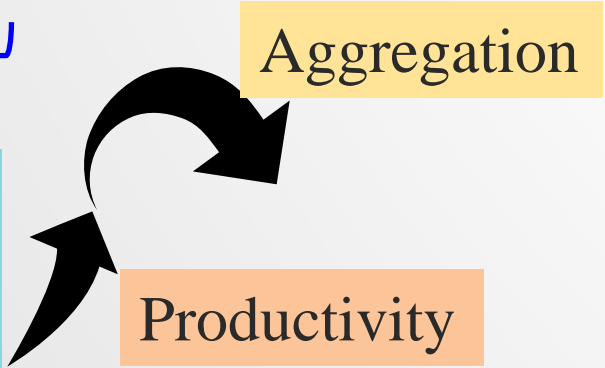

SSTG can changes the vertical movement of seawater and boundary layer thickness *(Chang, 2017)*

Large scale

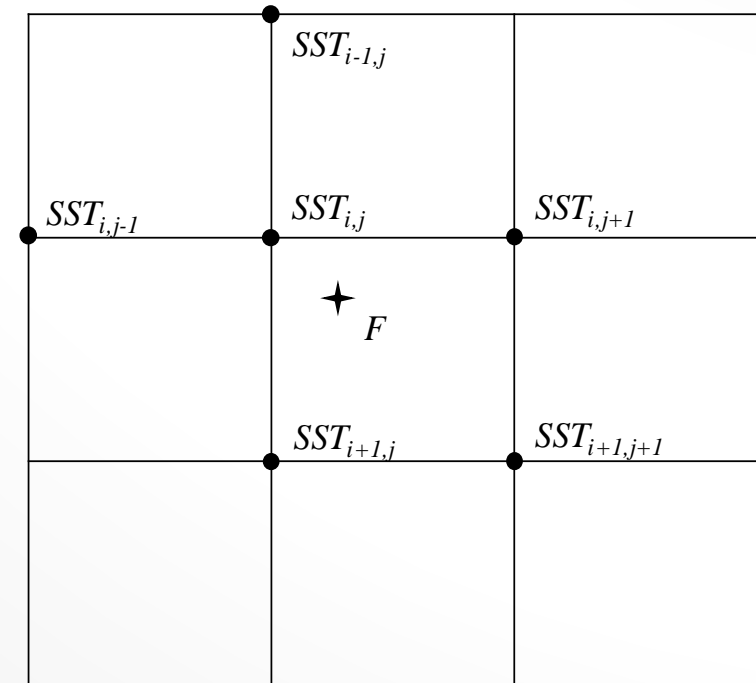

SSTG intensity of the western Pacific Ocean (0°N–10°N, 130°E–150°E) can affects ENSO events *(Hoel, Funk, 2013)*

SSTG could reflect the complexity of the ocean's system

$$SSTG_{i,j} = \sqrt{\left(\frac{SST_{i+1,j} - SST_{i-1,j}}{\Delta x}\right)^2 + \left(\frac{SST_{i,j+1} - SST_{i,j-1}}{\Delta y}\right)^2}$$

4. DISCUSSION

The SSTG

Medium and small scales

SSTG can changes the vertical movement of seawater and boundary layer thickness *(Chang, 2017)*

Large scale

SSTG intensity of the western Pacific Ocean (0°N–10°N, 130°E–150°E) can affects ENSO events *(Hoel, Funk, 2013)*

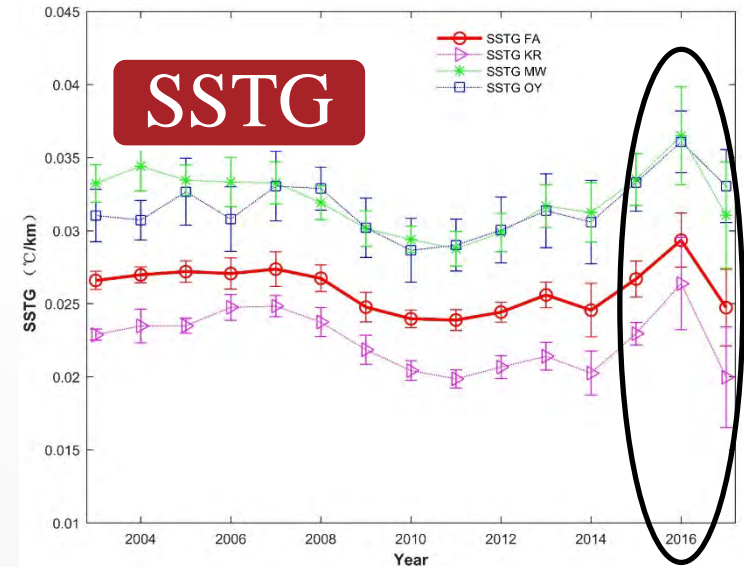

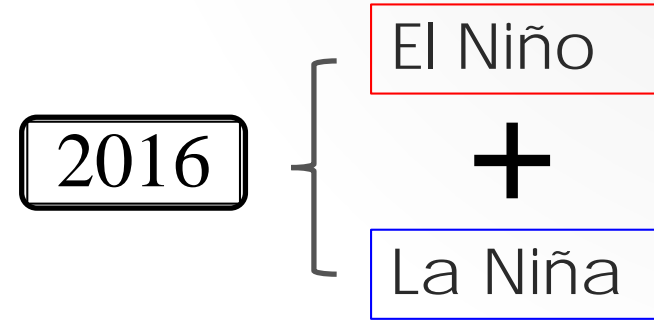

SSTG could reflect the complexity of the ocean's system
