

# PICES | North Pacific Marine Science Organization

PICES – the North Pacific Marine Science Organization – is an intergovernmental organization established in 1992 by its member countries (Canada, Japan, China, Korea, Russia, & USA) to promote and coordinate marine research in the North Pacific & adjacent seas. PICES facilitates international collaboration, research, and scientific outreach through its annual science meetings, international symposia, summer schools & capacity development events, special projects & science programs, and publishes scientific materials. With >4500 scientists and member institutions worldwide, PICES is an effective vehicle for international collaboration and information sharing. PICES encourages partnerships, and facilitates mentorship of early career ocean science professionals to ensure ongoing study of the North Pacific.

**Please Participate! Attend a meeting | Submit an abstract & present your work | Submit an article to PICES Press**  
**Ask your Governing Council representative about joining an Expert Group | Join a summer school or training course**

PICES' 6 member countries facilitate scientific knowledge creation & sharing through international collaboration & intergovernmental cooperation

Canada  
China  
Japan  
Korea  
Russia  
USA

PICES hosts scientific collaborators at interdisciplinary events & creates and shares scientific knowledge through PICES publications:

- Conferences
- Symposia
- Capacity development
- Training courses
- Special projects
- Workshops
- Scientific Reports
- Special Publications
- Technical Reports
- Primary Journals
- PICES Press
- Outreach materials

## PICES Publications & Links to Resources
