

ICES at PICES 2006

Adi Kellermann

Head of Science Programme

**International Council for the Exploration
of the Sea (ICES), Copenhagen, Denmark**

ICES at PICES 2006

Events for Joint Action

Ongoing: Symposium 2006

The Humboldt Current System: climate, ocean dynamics, ecosystem processes, and fisheries Lima, Peru, 27 Nov – 1 Dec, IRD-IMARPE-FAO-PICES-ICES

ICES at PICES 2006

Events for Joint Action

Ongoing: Symposium 2007

Symposium on Marine Bioinvasions, ICES-PICES-US Sea Grant College Program, Boston MA, USA, 21-24 May

Ongoing: Symposium 2007:

4th International Zooplankton Production Symposium, ICES-PICES-GLOBEC-The Plankton Society of Japan-The Japanese Society of Fisheries Oceanography, Hiroshima, Japan, 28 May – 1 June

ICES at PICES 2006

Events for Joint Action

Ongoing: Symposium 2007

Early Career Scientists Conference “New Frontiers in Marine Science”, PICES-ICES-NPRB, Baltimore MD, USA, 28-29 June

NEW: Symposium 2007:

Reproductive and Recruitment Processes of Exploited Marine Fish Stocks. PICES-ICES-NAFO, Lisbon, Portugal, 1-3 October (pending ICES Council decision)

ICES at PICES 2006

Events for Joint Action: 2008

Ongoing: Symposium 2008

Symposium on “Effects of Climate Change on the World Oceans”, ICES-PICES-IOC, Gijon, Spain, 19-23 May

NEW: Symposium 2008: PICES is invited to cosponsor

Symposium on “Herring: Linking biology, ecology, and status of populations in a changing environment”, ICES-GLOBEC-Marine Institute of Ireland, Galway, Ireland, 26-29 August

ICES at PICES 2006

2007 ASC, Helsinki, Finland: PICES is invited to co-sponsor the following

Integrating observations and models to improve predictions of ecosystem response to physical variability

Comparative Marine Ecosystem Structure and Function: Descriptors and Characteristics

The ecosystem approach: what's the impact on marine science, science based advice and management of marine ecosystems

ICES at PICES 2006

2007 ASC, Helsinki, Finland: more Theme Sessions...

Zooplankton Community structure and biomass in the mesopelagic and deeper layers

Effects of environmental changes on the biology, physiology and behaviour of pelagic fish.

Stock identification – applications for aquaculture and fisheries management
