

Prof. Charles Trick

- ❑ Dr. Charles Trick is a Professor in the Department of Physical and Environmental Sciences at the University of Toronto. His area of expertise is harmful phytoplankton in both marine and freshwater environments, as well as the human factors contributing to toxic blooms. Before January 2025, he served as the Director of the Institute for Inclusive Health and Well-being, where he concentrated on the effects of environmental changes on individuals and communities.
- ❑ He earned his Ph.D. in Oceanography at the University of British Columbia (Canada), followed by a PDF at the University of California, Berkeley.
- ❑ He has served as a professor since 1985, including holding the Endowed Beryl Ivey Chair for Ecosystem Health at the Schulich School of Medicine and Dentistry at Western University in Canada. He retired as a Distinguished University Research Professor and is currently an Emeritus Professor in the Department of Biology and the School of Public Health, both at Western University.
